## Bitters Bottle Nomenclature\*

### Bitters and Bitter Wording

Bottles and brands are included here when the word ‘Bitters’ or ‘Bitter’ appears lettered on the bottle, in the wording on the label, or mentioned in related advertising, ephemera, or other material.

Lettered bottles and ‘Bitters’ and ‘Bitter’ labeled products, advertising materials, and ephemera are listed alphabetically. Bottles with the word ‘Bitters’ embossed in the glass are primarily listed alphabetically beginning with the first word on the side of the bottle that the word BITTERS is embossed.

### Bitters Identification Number

Items located in *Bitters Bottles* are listed by their bitters identification number or page location in the index; for example, A 37 is bottle A 37, and p345 indicates it is located on page 345.

References to items located in the *Bitters Bottles Supplement* are preceded by a small ‘s.’ For example, sC 222 is item C 222 in the *Bitters Bottles Supplement*, and sp172 is located on page 172 in the *Bitters Bottles Supplement*.

References to items in *Bitters Bottles Supplement 2* are preceded by a ‘s2’. Item s2C 75.5 is item C 75.5 in *Bitters Bottles Supplement 2*, and s2p125 is located on page 125 in *Bitters Bottles Supplement 2*.

### Letter and Number

Bitters identified by embossed lettering on the bottle are given a letter and number. Lettering on glass is presented in bold capital letters.

The division of words on lines and on the sides of a bottle are indicated by slanted lines.

One slanted line ‘/’ indicated the end of a single line of lettering.

Two slanted lines ‘//’ indicated the end of lettering on that side of the bottle.

Sides of the bottle are also indicated by double slanted lines ‘//’.

The identifying code for lettering located on the shoulder is // s //, and on the base is // b //.

Lines under lettering are not shown nor are the curved, arched, or slanted base embossing patterns. Periods in the embossing are usually shown.

The following notations are used to signify embossing patterns:

/ End of a line of embossing

// End of the side of the bottle

// **f** // Flat panel of bottle

// **sp** // Sunken panel of bottle

// **c** // Curved side of bottle

// **b** // Lettering on base

// **u** // Lettering on the upper third of the bottle

// **l** // Lettering on the lower third of the bottle

**(au)** Lettering arches upward in the center of the indicated embossing

**(ad)** Lettering arches downward in the center of the indicated embossing

**(cu)** Lettering curves upward

**(cd)** Lettering curves downward

**(su)** Lettering slants upward

**(sd)** Lettering slants downward

**(l>s)** Lettering telescopes from large to small **(s>l)** Lettering telescopes from small to large **(ed)** Lettering starts and ends small, enlarged in the center (elongated diamond shape)

**(l > s < l)** Lettering starts and ends large, narrowing in the center

**motif** Indicates a picture or monogram

**L . . .** Wording on an attached label

### **Wording on Label**

Label-identified brands are bitters identified by the wording on the label. Wording on the label is in upper and lower case letters preceded by the bold symbol **L ...** Often the brand name on the label is longer and more descriptive than the lettered name on a bottle.

### **Color**

Bitters are found in many colors, hues, and tones. Color descriptions used by contemporary auction houses and collectors have been used.

## Mouth

Descriptions used for bottle mouths are as follows:

Applied mouth: mouth formed with the addition of glass to the top of the neck.

Tooled lip: mouth formed with a lipping tool from glass in the neck as it came from the mold.

The terminology used to describe the shape of the mouth:

LTC Long tapered collar

DTLC Double long tapered collar

LTCR Long tapered collar with a ring

STCR Short tapered collar with a ring

NSC Narrow square collar

CM Collared mouth

DC Double collar

ARM Applied ring mouth

FM Flanged mouth

SM Sheared mouth

RC Rounded collar

## Rarity

Rating: Number of specimens known to collectors.

Extremely rare	1 - 5
Very rare	6 - 15
Rare	16 - 35
Very scarce	36 - 75
Scarce	76 - 150
Common	more than 150

Bottles identified by paper labels 'L ...' are typically not given rarity ratings. Paper labels could have been and often were put on a variety of empty containers. There is no accurate way of judging their rarity. Bottles that do not have the word 'Bitters' embossed are usually not given a rarity rating.
